

I lived in Oklahoma City for four years and listened to K-LOVE radio on a daily basis. I not only listened for the positive music but also for the news, weather and local events. I know K-LOVE has become an important part of many peoples lives. Allowing a LPFM station to override a translator station would mean losing K-LOVE. I know this would be detrimental to the communities effected. I know that K-LOVE provides services that are in the best interest of all listening. It would be a huge loss to the effected communities if the LPFM stations were able to take priority over current FM translator services. Thank you.
